Beekeeping in Greece

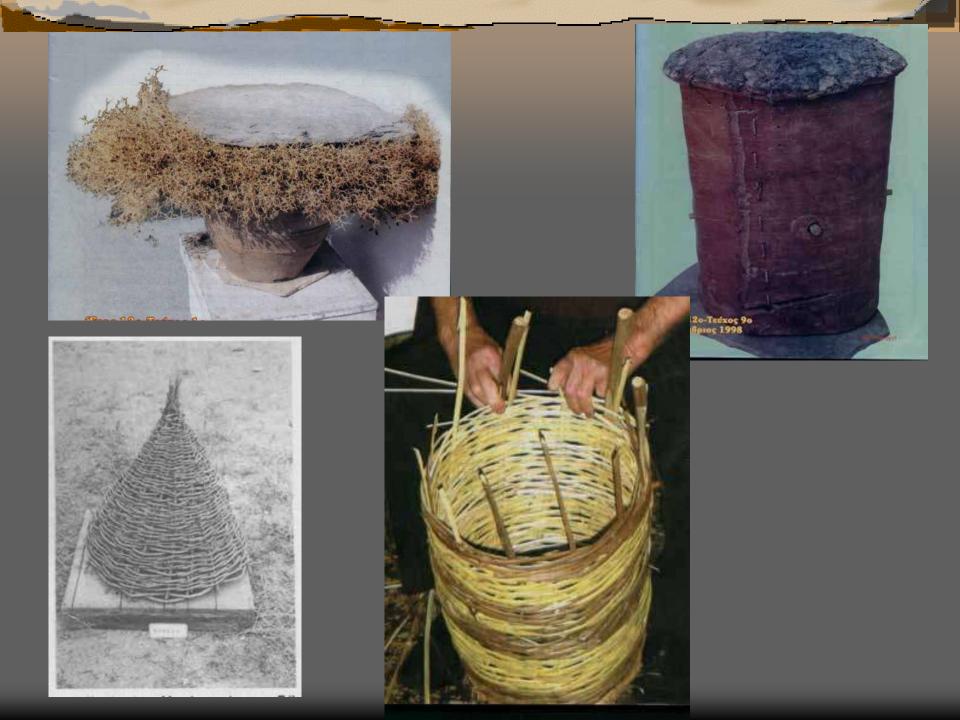

F. HATJINA Hellenic Institute of Apiculture N. Moudania, 63 200

Past times

<u>Present time</u>

No of beekeepers: 22,000

No of colonies: 1,380,000

Professional beekeepers: 4,000

Colonies: 770,000

Average honey production: 14,000 tones

Honey imports: 1,600 tones

Honey exports: 300 tones

Colony density

(Williams et al. 1991)

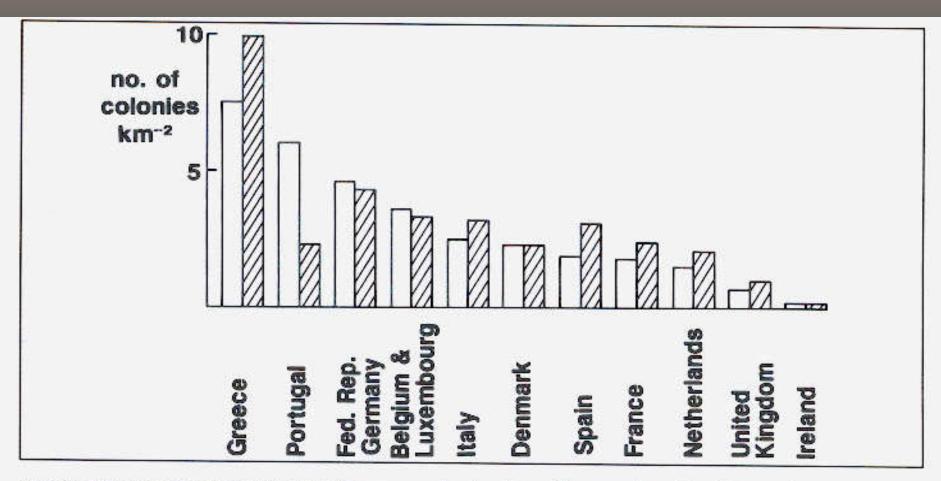

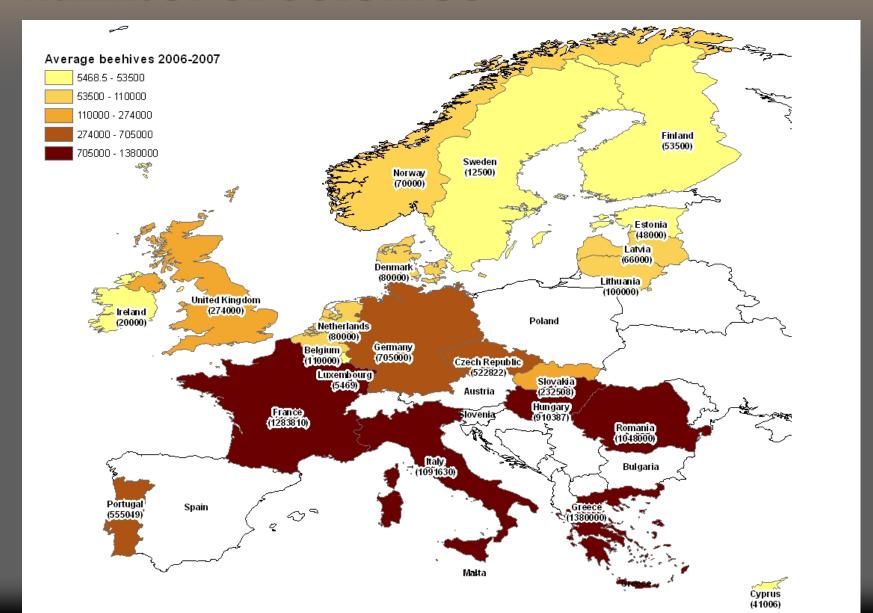

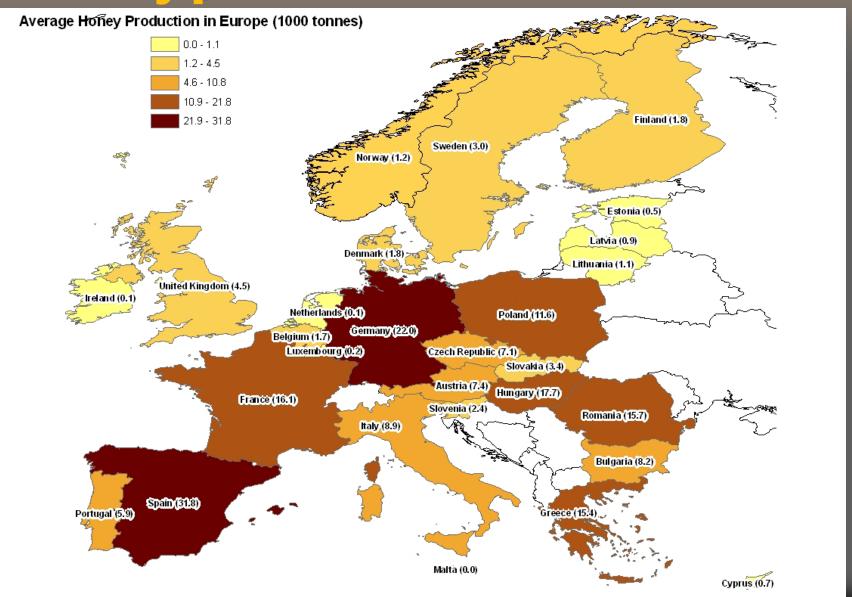

FIG. 8. Estimated mean density of managed colonies of honey bees/ km² in each EC country for c 1970 ___ and c 1989 ____, derived using colony numbers from Crane** and COPA/COGECA**, and land areas from Agricultural Situation in the Community**.

Number of colonies

Honey production-4th

Honey bee races

(Ruttner 1988)

Honey bee races

(Hatjina et al, 2002)

Queen breeding

- UGood, mated queens are sold for about 12-15€(naturally mated)
- About 10 people are queen producers, but we have no specific information on their activity
- a number of about 50.000- 60.000 queens are produced each year
- Utwo of the breeders use instrumental insemination

<u>Diseases</u>

Varroa was the most serious disease, but now days Nosema is the problem

Control for Varroa:

Apistan (fluvalinate), Perizin (coumaphos), Apitol (cymiazol), Bayvarol (flumethrin), ApiGuard (thymol), Check mite strips (coumaphos), thymol, oxalic acid

Honey production - main areas

Pine honey

Clover, cotton honey

Citrus honey

Fir honey

Thyme honey

Chestnut honey

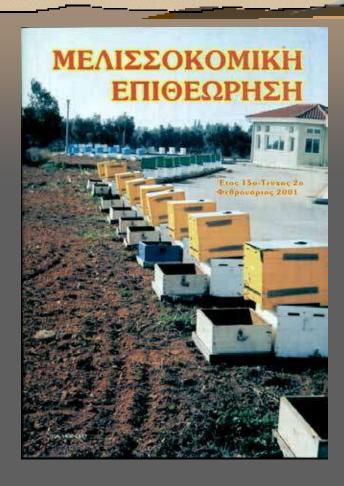

Organizations

- About 70-80 beekeeping co-operative units joined in one Co-operative body 'MELISSOKOMIKI'
- **U** About 50 syndicalism unions joined in one central body 'FEDERATION OF GREEK BEEKEEPING ASSOCIATIONS'

<u>Journals</u>

'Melissokomiki Epitheorisi'

'Melissokomiko Vima (Beekeeping tribune) by the Federation of Gr. Beek. Associat.

Research institutions

- **□** Lab. of Apiculture Sericulture, School of Agriculture, Aristotle Univ. of Thessalonik
- Lab. Of Agricultural Zoology and Entomology, Agriculture Univ. of Athens
- Lab. of Apiculture Sericulture, Agriculture Univ. of Athens
- **Ü** Other Research Institutes.....

Hellenic Institute of Apiculture

Is the only Bee Research Institute under the auspices of National Agricultural Research Foundation of Greece (N.AG.RE.F.), which is supervised by the Ministry of Agriculture

Bee Research

- **U** Varroa control
- **U** Nosema control
- Study on a thermo-regulated chamber for Varroa control
- Study on the adhesion mechanisms of varroa
- **U** Identification of honey types
- Study on parameters affecting honeydew secretions
- **U**The effects of neo-nicotinoids on bees

Bee Research

- **U** Study on *Marchalina hellenica* on Fir trees (Apies spp.)
- Recordings of melliferous flora in Greece
- Study on insects producing honeydew on fir trees
- **Ü** Pesticide residues in bee products
- Bio-diversity of wild bees in cultivated areas
